ELECTRONIC GEOPHYSICAL YEAR: STATE OF THE ART AND RESULTS

3 - 6 June 2009
Pereslavl-Zaleskiy

Dear Colleagues!

We invite you to take part in the International Conference “RESULTS OF THE ELECTRONIC GEOPHYSICAL YEAR”, from 3 to 6 June 2009 in Pereslavl-Zalessky one of beautiful ancient towns of the Russian Golden Ring. Founded in 1152, the town is located 144 km from Moscow on a bank of the picturesque Plescheevo Lake surrounded by coniferous forests. The conference will take place in the Institute of Program Systems RAS.

What is eGY?

The program “Electronic Geophysical Year” (eGY) 2007-2008 envisages creation of special virtual sources of information on geophysical data (virtual observatories) in the scale of the global network and development of systems of data mining, data stewardship and scientific analysis of data.

Conference Themes

- Electronic Geophysical Year. Results and showcase products of eGY.
- “Electronic Geophysical Year”, “International Polar Year”, “International Heliophysical Year”, “Year of the Planet Earth”
- Transition of World Data Centers into World Data System
- Artificial intelligence methods in geoinformatics and geoscience
- GRID systems
- Geoinformation systems in fundamental and applied scientific problems
- Problems of geoinformatics in seismology and geocology
- Geomagnetic observations, geoinformatics and virtual observatories
- Global changes, climate and weather of the solar-terrestrial system
